Clery Act

Federal statute codified at 20 U.S.C. § 1092(m), with implementing regulations in the U.S. Code of Federal Regulations at 34 C.F.R. 668.46.

Terrorist's act - Khobar Towers Housing Complex, Dhahran, Saudi Arabia

2X Beirut in 1983

80 X larger than any previous bomb in Saudi Arabia

UFC 04-010-01

DoD Minimum Antiterrorism Standards for Buildings

Annex B: Initial requirements for Mass Notification

The Air Force petitioned NFPA to develop MNS standards

The military found that they could not use approved fire alarm systems for Mass Notification while remaining in full compliance with NFPA 72

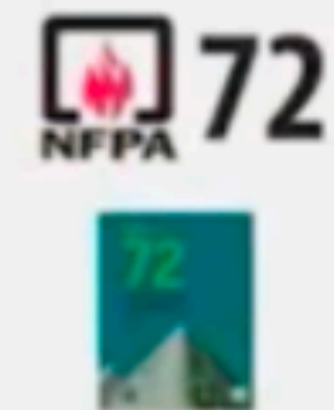

CONTROL AND COMMUNICATION UNITS FOR MASS NOTIFICATION SYSTEMS

NEW Standards by UL. For systems to comply and provide **MNEC with HIGHEST PRIORITY**

2018 IBC and NFPA 101

Risk Analysis for Mass Notification Systems

Chapter 24

Emergency Communications System (ECS)

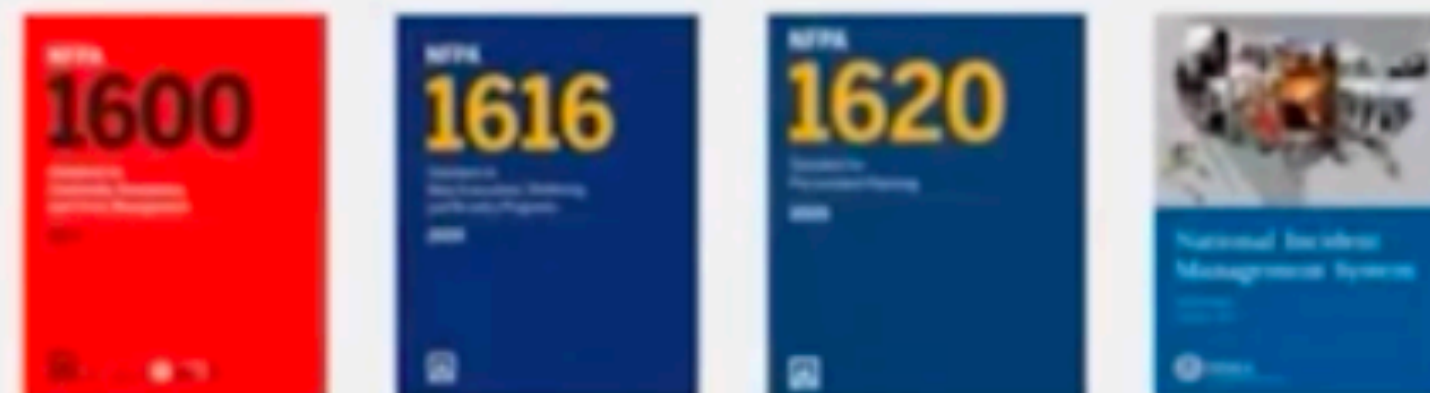

Chapter 7: Documentation

Chapter 10: Fundamentals Reorganized

The Clery Act also requires schools to **send timely warnings to the school community** when there are known risks to public safety on campus.

3 Year assessment due every October

Supplemental

Mass Notification Systems.

Education requires a Risk Analysis for Mass Notification Systems is significant component of a IMS & ERP...

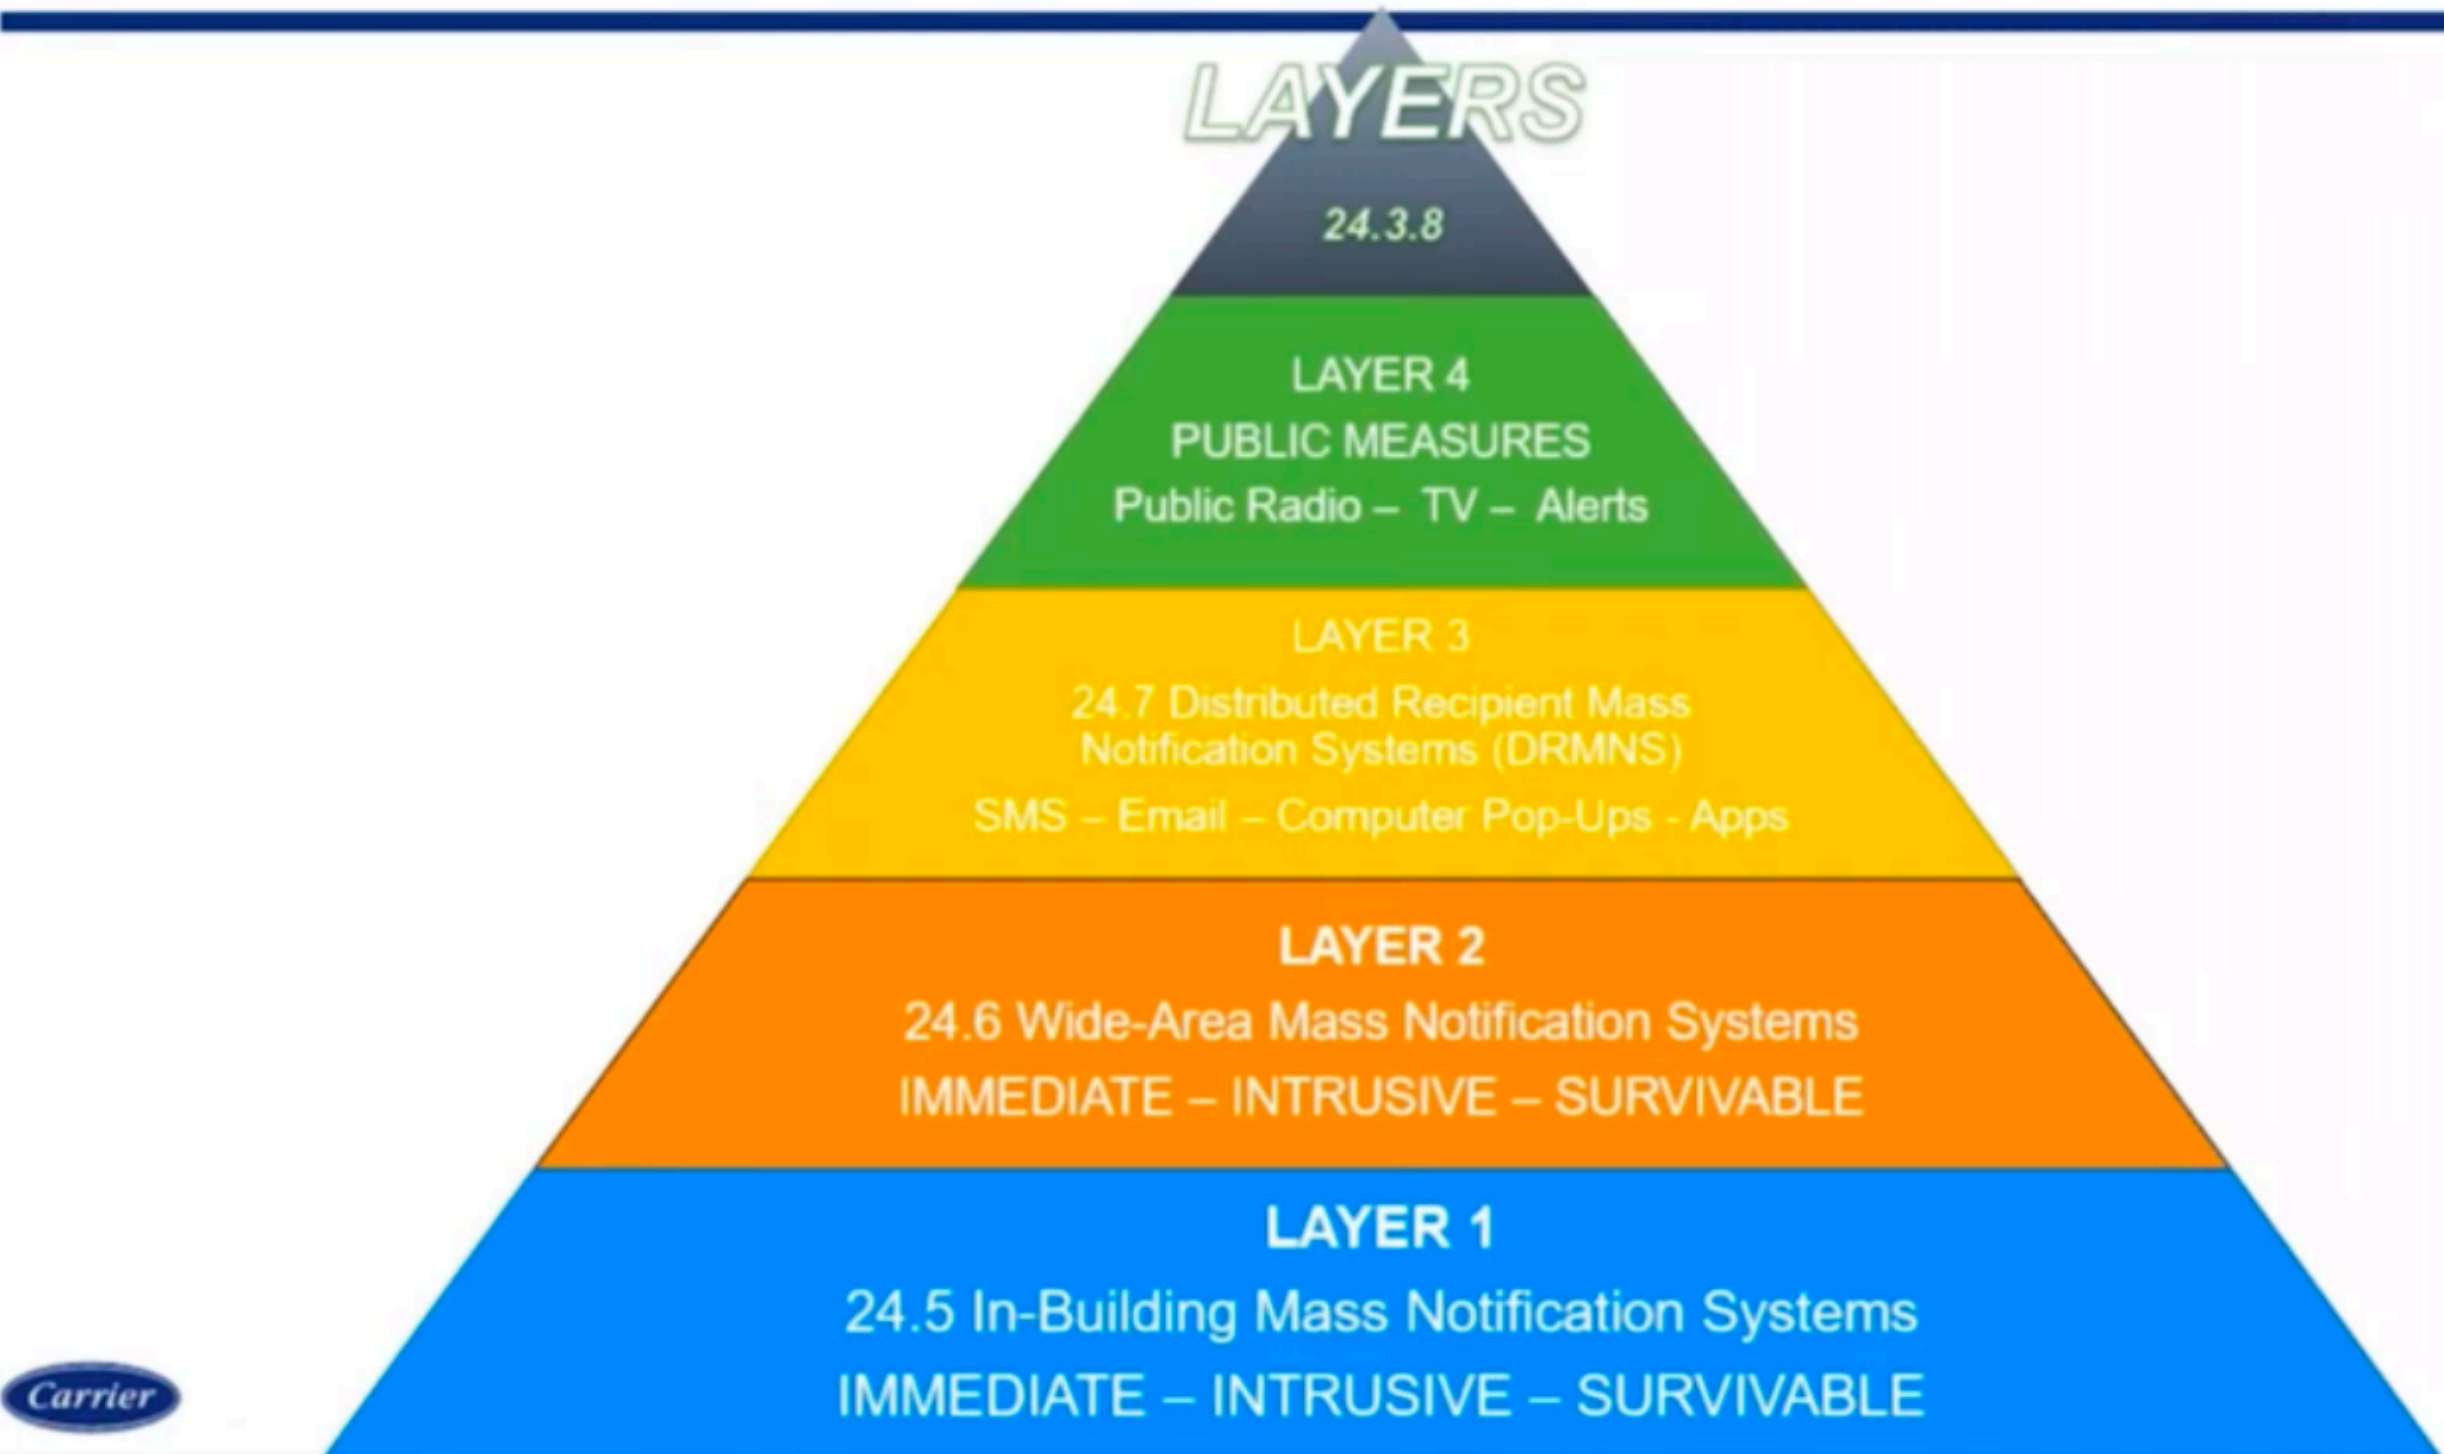

Chapter 24: ECS added use of Microphones and Textual Appliances

INTERTEK'S LIFE SAFETY & SECURITY SERVICE SOLUTIONS

The Life Safety & Security industry plays a critical role in safeguarding individuals and organizations, and its products and services are essential for maintaining public safety and protecting valuable assets. Partner with Intertek to navigate regulatory complexities from compliance testing to global market access and bring trusted, secure solutions to the market.

NFPA 72 Layers defined

Life & Security Standard

With testing expertise across a wide range of Life Safety and Security products and technologies, Intertek tests to both national and international standards and can help extend your brand's reach and recognition around the world. Our scope of testing capabilities includes, but is not limited to, the following LSS standards widely recognized and implemented across various industries and sectors:

- 1-Fire Safety Standards
- 2-Fire Protection and Suppression
- 3-Security Standards
- 4-Emergency Preparedness and Communications Standards
- 5-Occupational Safety Standards
- 6-Electrical Safety Standards

EN-European standard

- EN 54-5: Fire Detection and Fire Alarm Systems - Part 5: Heat Detectors - Point Heat Detectors
- EN 54-7: Fire Detection and Fire Alarm Systems - Part 7: Smoke Detectors - Point Smoke Detectors using Scattered Light, Transmitted Light or Ionization
- EN 54-10: Fire Detection and Fire Alarm Systems - Part 10: Flame Detectors - Point Detectors
- EN 149: Respiratory Protective Devices - Filtering Half Masks to Protect against Particles
- EN 14604: Smoke Alarm Devices
- EN 50133: Alarm Systems - Access Control Systems for Use in Security Applications
- EN 50291: Gas Detectors - Electrical Apparatus for the Detection of Carbon Monoxide in Domestic Premises Test Methods and Performance Requirements
- EN 60079-29-1: Explosive Atmospheres - Part 29-1: Gas Detectors - Performance Requirements of Detectors for Flammable Gases

NFPA-National Fire Protection Association

NFPA 72: National Fire Alarm and Signaling Code

NFPA 1981: Standard on Open-Circuit Self-Contained Breathing Apparatus (SCBA) for Emergency Services

NFPA 1983: Standard on Life Safety Rope and Equipment for Emergency Services

NFPA 1984: Standard on Respirators for Wildland Fire Fighting Operations

NFPA 1986: Standard on Respiratory Protection Equipment for Tactical and Technical Operations

NFPA 1987: Standard on Combination Unit Respirator Systems for Tactical and Technical Operations

NFPA 2500: Standard for Operations and Training for Technical Search and Rescue Incidents and Life Safety Report and Equipment for Emergency Service

UL-Underwriters laborations

UL 217: Single and Multiple Station Smoke Alarms (Residential)

UL 268: Smoke Detectors and Fire Alarm Systems (Commercial)

UL 294: Standard for Access Control System Units

UL 521: Heat Detectors for Fire Protective Signaling Systems

UL 681: Installation and Classification of Burglar and Holdup-Alarm Systems

UL 827: Standard for Central Station Alarm Services

UL 1023: Household Burglar-Alarm System Units

UL 1076: Proprietary Burglar-Alarm Units and Systems

UL 1641: Installation and Classification of Residential Burglar-Alarm Systems

UL 1981: Central Station Automation Systems

UL 2034: Single and Multiple Station Carbon Monoxide Alarms

UL 2050: National Industrial Security Systems for the Protection of Classified Materials

UL 2075: Gas and Vapor Detectors and Sensors

UL 2524: In-Building 2-Way Emergency Radio Communication Enhancement Systems (ERCES)

UL 2524A: In-Building Auxiliary Radio Communication Systems (for NYC)

UL 2525: Two-Way Emergency Communication Systems for Rescue Assistance

COMMON INDUSTRY CERTIFICATION MARKS

The above is a sample of popular certification marks used within the building products market. The various organizations represented each have different scopes of accreditation and play different roles in the testing and certification process.

BUILDING PRODUCT CERTIFICATION MARKS

The below marks are a representation of common certification used on building products. While this is not a complete list, it represents the vast majority of certification marks used. NOTE: there are different variations of the marks below and a more comprehensive representation of each organization's marks can be found on their website.

PRODUCT LABELING

A building official presented with a listing or with a product bearing the mark of the listing agency still needs to connect the listing with the code requirements. In many cases, the code will have requirements for the product or installation requirements that go beyond what the listing covers.

The below is Intertek's Directory of Building Products and represents how a certification agency's product directory would look and function like. Typically product directories provide a number of ways for the user to find the product of interest.

BPDLP.intertek.com

Ability to search and view research reports

Search ability via key words

Can find a listing through the company name, category listing, CSI code, or the standard.

Labeling for proper identification of listed products shall include the following:

- 1) Company Name
- 2) Product Name
- 3) Certification Mark (with applicable country identifiers)
- 4) Certification Number
- 5) Words "Certified To" and applicable test standards
- 6) Product rating and/or classification as specified in listing report (when applicable)
